EDUCATION

Chennai Institute Of Technology

Expected May 2027

B.E. Computer Science and Engineering

PROJECTS

Real-Time Text2Sign (ISL) & Sign-to-Speech System

Python | OpenCV | MediaPipe | Deep Learning

- Developed a real-time system that **converts text to ISL gestures and sign language to speech using computer vision**.
- Built and trained a **CNN-LSTM model** on custom gesture datasets to accurately recognize hand signs and movements.
- Optimized the application for smooth real-time predictions and deployment on Raspberry Pi devices.

Distributed Code Execution & Evaluation Platform

React.js | Node.js | Docker | Redis

- Developed a **secure online coding platform** supporting multi-language code execution using Docker containers.
- Implemented **Redis-based job scheduling** to manage and process multiple code submissions efficiently.
- Built **REST APIs** for code evaluation, test case execution, and real-time performance feedback.

CI/CD Pipeline Orchestrator

Java | Spring Boot | MySQL | REST APIs | ExecutorService

- Developed a CI/CD Pipeline Orchestrator using **Java, Spring Boot, MySQL, and REST APIs**.
- Implemented asynchronous build, test, and deployment workflows using **ExecutorService and multithreading**.
- Designed a modular backend architecture for pipeline management, monitoring, and execution tracking.

INTERNSHIP

CubeSat intern - ULOG3, Chennai.

Nov 2023 - Apr 2024

Python | OpenCV | Deep Learning

- Developed **image processing** pipelines for satellite vision tasks including enhancement and object detection.
- Trained and evaluated **deep learning models** using experimental datasets to improve prediction accuracy.
- Integrated Raspberry Pi camera modules for real-time image capture and embedded system testing.

SSV Traders & InternPe Web Developer Intern

May 2024 - June 2024

React.js | HTML5 | CSS

- Developed responsive web interfaces using **React.js** with reusable components and modern UI practices.
- Built frontend applications with optimized layouts, routing, and cross-device compatibility.
- Improved user experience by implementing interactive features and enhancing application performance.

SKILLS

Languages: Python, Java, JavaScript, SQL

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs

AI/ML & Computer Vision: OpenCV, MediaPipe, PyTorch, TensorFlow

Databases & Tools: MongoDB, Redis, Docker, Git, VS Code

ACHIEVEMENTS

- Solved 500+ DSA problems** across coding platforms, strengthening problem-solving and algorithmic thinking skills.
- Secured a **global rank of 1909 in LeetCode contests**, demonstrating competitive programming proficiency.
- Collaborated with peers on academic and technical projects, contributing to planning, development, and problem-solving activities.

COURSE

- Cisco CCNA (Introduction to Networks, Cybersecurity essential, Programming Essentials in Python)
- AWS Certified Cloud Practitioner
- Microsoft Azure AI Fundamentals: Generative AI
- Ethical Hacking NPTEL (Elite)
